

How to add a variable product

How to add a variable product (the same steps apply for editing a product from simple to variable)

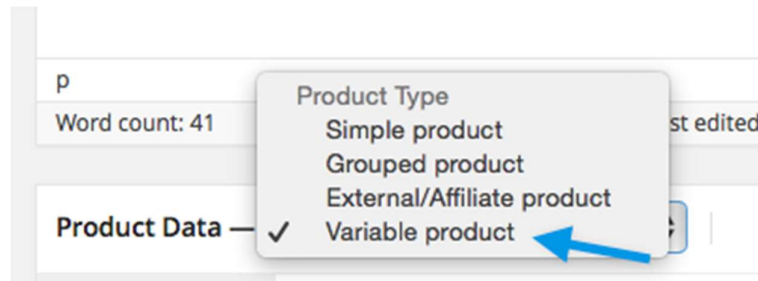

Step 1. Set the product type

To add a variable product, create a new product or edit an existing one.

Go to: WooCommerce > Products (on the backend dashboard of the site).

Select the Add Product button or Edit an existing product. The Product Data displays.

Select Variable product from the Product Data dropdown.

Step 2. Add attributes to use for variations

In the Attributes section, add attributes before creating variations — use global attributes that are site wide or define custom ones specific to a product. (See diagram below).

Custom attributes specific to product

If adding new attributes specific to this product:

1. Select Custom product attribute, and Add.
2. Name the attribute (e.g. Size),
3. Set values separated by a vertical pipe (e.g., small | medium | large)
4. Enable the Used for variations checkbox.

Size ▲ Remove

Name: Value(s):

Used for variations

Save attributes Custom product attribute ▼ Add

5. Click **Save attributes**.

Step 3. Add variations

To add a variation, go to Variations section in the Product Data meta box.

Manually Adding a Variation

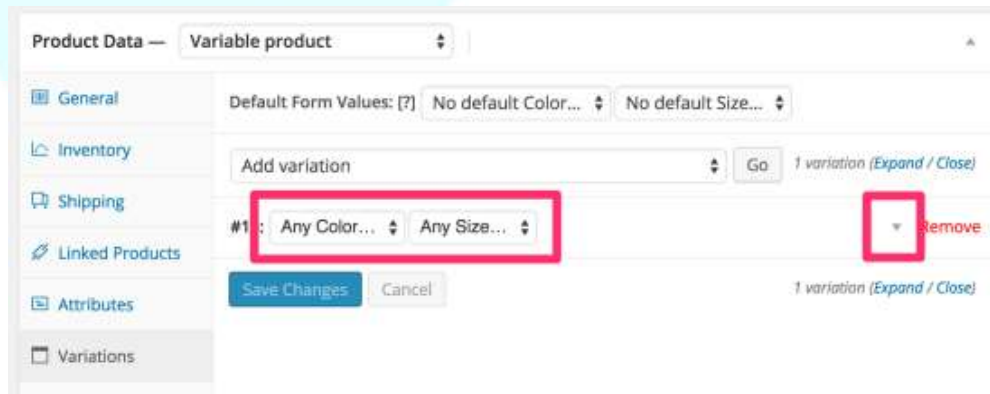

1. Select Add variation from the dropdown menu, and click Go.

- Inventory
- Shipping
- Linked Products
- Attributes
- Variations**

Add variation ▼ Go

2. Select attributes for your variation. To change additional data, click the triangle icon to expand the variation. (diagram below).

3. Edit any available data. The only required field is Regular Price.
4. Save Changes.

Add an image for the variation

1. Expand the variation.
2. Click the blue image placeholder (screenshot).
3. Select the image you wish to use.
4. Save.

End.
